PROBLEM CODE Gas Leak

REPORTED PROBLEM

*NEED TO RETURN TO REPIPE GAS TO FIRPLACE AS WELL AS INSTALL NEW CONDENSATE PUMP****SCH 1/9/26 8-9 EMAILED KRISTI TO SEE IF THIS TIME WORKS. DD confirmed and she will leave the door unlocked. Please call her on the way. DD

1/8/26 FIREPLACE GAS VALVE ORDERED FROM JS-A FEW DAYS OUT. BV

OT AUTH***KRISTI STOPPED BY TO CHECK OUT THE HOUSE AND HAS A GAS SMELL IN THE HOUSE. CRYSTAL FLASH WAS OUT TO REPLACE THE PROPANE TANK RECENTLY. GAS WAS SHUT OFF AND HOUSE IS AT 43 DEGREES. KRISTI SHUT GAS BACK OFF.

DOORS TO MAIN HOUSE AND COTTAGE HOUSE WILL BE UNLOCKED. LOCK UP WHEN YOU LEAVE AND CALL KRISTI TO LET HER KNOW WHAT YOU FOUND. BV

CORRECTIVE ACTION

1/7/2026 Nate - Home had strong sewer smell on arrival. House only 43 degrees. Started furnace to warm up house. Ran water in all sinks to fill traps. Sewer smell went away but smell of propane still in air. Used sniffer on all gas lines and connections. Isolated leak to fireplace in living room. Detector went off on connection coming directly out of floor. Tightend connection. Propane smell did not go away. Used soap bubbles on all connections from floor to fire place gas valve. Leak detected at gas valve and connecton from flexible connector to male adapter at gas valve. Gas valve needs to be pulled and connections need to be redone. Kristi advised we could accomplish this during Monday when we winterize the house. Secured gas to fireplace. Smell of propane gone. When returning to basment to gather tools water found on basement floor. Condensate pump tray is cracked. Kristi advised to temporary pipe to floor drain until we can install new condensate pump. ****NEED TO RETURN TO REPIPE GAS TO FIRPLACE AS WELL AS INSTALL NEW CONDENSATE PUMP****

1/9/26 Fisher B spoke with Nate and picked up fittings/parts. Replaced nipple and redid all connections going to gas valve, replaced appliance connector as well. Turned gas back on and soap tested fittings when done - no longer leaking. Cut out pipe going to floor drain and replaced condensate pump, flushed condensate - no longer leaking. *returned unused parts to deweese*

PROBLEM CODE Winterize House

REPORTED PROBLEM

WINTERIZE HOUSE AND ADU. SCH 1/13/6 8-9. CALL KRISTI ON WAY-HOUSE WILL BE UNLOCKED-LOCK UP WHEN DONE.BV

CORRECTIVE ACTION

1/13/26 Cole H
 Upon arrival found water leak in kitchen coming from refrigerator located water leak inside of refrigerator near water filter. Contacted kristy about water leak. Started on winterization, powered off water heater and started to drain in main house once drained bypassed water heater and started adding RV anti freeze throughout system. Main house has two bathrooms and a kitchen ran RV through dishwasher and refrigerator to ensure it is winterized also drain two copper half inch waterlines in basement at bottom of steps, then flushed from the house to the well draining at wellhead, then started on cabin behind house cabin has one single bathroom laundry and kitchen powered off water heater and drained, ran RV from main house all the way to cabin flush through all fixtures. Once RV was coming out pink turned off both furnaces in main house and cabin in winterized condensate and condensate pumps 19 gallons used contacted kristy about water softener and iron filtration in basement. She is getting Culligan out to winterize.
